

## **Mobile Manufacturing**

I am pleased to inform that CII in association with Messe Muenchen India is organizing a conference on mobile manufacturing on Wednesday, 26<sup>th</sup> of September 2018, from 9:30 am to 17:30 pm at BIEC Bangalore.

In the era of digital transformation, mobiles, especially smartphones, are playing a prominent and pivotal role and are constantly pushing manufacturing technology at a dramatic pace. Smaller, faster or smarter solutions from this industry have direct impact to the total consumer electronics sector as well. Mobile devices is one of the key segments where India is expected to see more growth in terms of local value addition and it will serve as the front runner for the country's economic development.

The one-day-long conference will expect over 150 participants including CXOs', Business heads, innovators, policy makers, angel investors, and academia.

The event will have focused sessions on opportunities and challenges in the industry, the country's research and innovation eco system and new technologies.

Thought leaders from across the country will present their views, opinions on the sector's outlook and introduce case studies helping to put things into prospective.

Look forward to meeting you.

Regards

CII – Chairperson for Mobile Technology Conference

Mr. Robert Grobbauer  
Managing Director & COO, AT&S India
