

Advantage India summit

Bringing the billion together: “mobile manufacturing, the way ahead”

The supporting program for productronica India 2019 will be finalized in summer 2019. In the meantime you may check the supporting program of productronica India 2018 below.

The demand for electronics products in India is expected to reach USD 400 billion by 2020. ‘Make in India’ is an initiative by the Indian government to encourage international companies to manufacture their products in India. Under this initiative, various schemes have been announced to support the electronics manufacturing ecosystem in end user segments as well as electronic components and design.

Date:	September 26, 2018
Time:	09:30–17:30
Venue:	Cassia hall, Conference Center, BIEC, Bengaluru
Organized by:	Messe Muenchen India & Confederation of Indian Industry (CII)

Organizer

Agenda	
Theme:	Bringing the billion together: “mobile manufacturing, the way ahead”
09:30–10:30	Registration
10:30–11:40	Inaugural session
11:40–12:00	<i>Networking tea break</i>
12:00–13:00	Session 1: How mobile manufacturing can serve as front runner? How can India leap ahead in mobile manufacturing?
13:00–14:00	<i>Lunch</i>
14:00–15:00	Session 2 Opportunities and challenges in the mobile manufacturing ecosystem
15:00–15:30	<i>Tea break</i>
15:30–16:30	Session 3: Developing country's innovation and research ecosystem
16:30–17:30	Session 4: Learning from global mobile manufacturing practices to create value in localized mobile manufacturing innovations - Sharing of best practices
17:30	<i>Closing remarks</i>

Welcome address: Confederation of Indian Industry (CII)

I am pleased to inform that CII in association with Messe Muenchen India is organizing a conference on mobile manufacturing.

In the era of digital transformation, mobiles, especially smartphones, are playing a prominent role and are constantly pushing manufacturing technology at a dramatic pace. Mobile devices is one of the key segments where India is expected to see more growth in terms of local value addition and it will serve as the front runner for the country's economic development.

The conference will expect over 150 participants and will offer focused sessions on opportunities and challenges in the industry, the country's research and innovation eco system and new technologies.

Look forward to meeting you.

Regards

CII – Chairperson for Mobile Technology Conference

Mr. Robert Grobbauer

Managing Director & COO, AT&S India
